

Little Ben XL

LUXURY VINYL PLANK

Our beloved Little Ben plank is now wider, longer, and stronger with a new FLEXCOR platform for installation that's easier than ever! At 7" wide and 5' long, this ultra-stable plank features the same click-and-lock installation our customers and professional partners adore, with a 5.5mm overall thickness for the strongest Little Ben product yet. Breathe easy with zero off-gassing and VOCs (all of our products are FloorScore certified) and move through life without worries thanks to Little Ben XL's commercially-rated 20-mil wear layer and fully waterproof body & backing.

What is FLEXCOR? We combined PVC, stone, and proprietary resins to create a superior-performing floor. FLEXCOR is rigid enough to stop telegraphing, but flexible enough to contour to the natural rolls and imperfections in your floor - 25% more tolerant of imperfections, to be specific, and now the click joints last longer, too.

Little Ben XL is protected by a 30 year residential warranty—but we don't think you'll need it.
