**TECHNICAL INFORMATION:**

Note from the factory:

The collection can be used on an exterior wall, since there are no specific issues with the exposition to the sun or other weather conditions. Clearly, stains due to rust or other conditions are not always cleanable with the same products and actions usually performed with standard tiles, especially in this case due to the metal/gold surface.

Same concept can be applied to shower and wet areas – it's completely normal that there will be deposits of limescale. In order to clean them, weak acid and microfiber cloth must be used periodically. **DO NOT USE ABRASIVE SPONGES OR SUBSTANCES**
