

Montana Plank

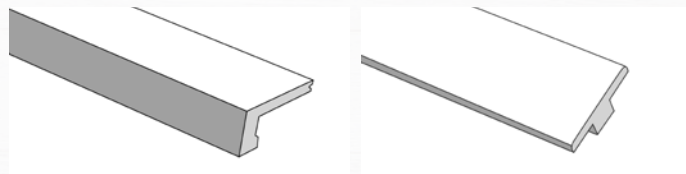

HARDWOOD

Our Montana Plank is a selection of unique and stunning floor boards reminiscent of those found in the most beautiful mountain homes- these planks are up to 75" long (average length is about 56") using stunning white oak hardwood with precision filled knots and cracks to give the floor a rustic elegance. Each 7.5" extra-wide plank is individually hand-selected to create a unique, timeworn appearance. Montana infuses history into modern spaces, with the added durability and engineering behind modern hardwood products. The surface is enhanced by a subtly hand scraped wire brushed texture, and an authentically hand-chiseled bevel. A low-gloss finish accentuates the wood's timeless appeal. This gorgeous collection has a unique grain structure and a hand rubbed stain, giving it the look of a genuine foot-worn plank floor hewn centuries ago. Montana Plank features an incredible birch core for excellent stability, and is protected by a 35-year residential warranty. We do our best to represent our hardwood products accurately with our images, but as with any natural product our hardwood floors feature variations in colour and grain.
